

LA FAVORITA

Category: More
business description:

The Delodi brothers have more than 40 years of experience in the production of rice, barley, wheat and corn. For the cultivation of rough rice, as well as for the most valuable qualities (Carnaroli, Baldo, Arborio) they apply integrated and eco-friendly production techniques. The rice is then processed and packaged for direct sale on the farm. They also breed Piedmontese cattle and produce cured meats.
